

Lot 31
1 yr hind

CANES DEER
Quality Genetics

Tag No:
9370

Hind 940 produced the top priced stag at Tower Farms in 2003 which sold for \$16 000. We purchased this hind the following year. Last year she was a donor in our ET programme with great results. Two of her son's are in our top spiker mob. I would expect results from this hind.

Son of G23

G23 has been one of our most consistent trophy hinds. We have used her as a donor. An earlier son of hers, R9546, is in the trophy mob this year with a super wide high scoring head.

Dam P256 is a full sister to Spartacus. We haven't had any male progeny from her as yet but surely Spartacus' heavy clean antler and coupled with Odyseus 630 IOA will create something special.

Dam 7668 was purchased from Foveran after seeing her Dam, 935's 2 yr son who sold for \$23000. Crossed with Odysseus and taking into account the very heritable Jamieson over 935, the double up of Furzeland blood should give great results.

G6046 was included in the ET programme. A stag of the same breeding scored 410 IOA @ 4yrs with great bottom tynes and scoring tops. 2 of her full brothers, 9384 and 9358, are in our top spiker mob which confirms the strength of this bloodline

B53 is a full sister to Insane who won the 1 yr rising stars competition in 2006 with a huge 40 point head. He has gone on to grow a large head that should nudge 500 IOA this year. Odysseus should add width and length.

702 was purchased from Windermere as a weaner 2 years ago mainly to access the powerful genetics of hind 900, a full sister to Kane. Aztec over 900 with Odysseus over top is an interesting mix.

We purchased the dam 6248 from Foveran as a weaner. Grandam PDS 6/01 is a very reliable producer of trophy stags for Foveran. With Awesome, Kane and Odysseus all in the mix I doubt there is a hind with a better trophy pedigree. This one is special.

Sergei is the unofficial World Record CIC with 262 points, and 16.9kg HA. Broadband over this breeding should result in this hind producing quality offspring. It is worth noting that DG stag Morpheus is a Sergie/Furzeland cross.

Maximilian was Stanfield's master Eastern sire for many years, and when crossed with Sergei the results have been consistently good. Broadband should complement their main beam length with points and width.

I would expect that Broadband over this Maximilian/
Henrich cross should certainly produce the top quality
trophy stags that the market is demanding.
